

GPA Or CGPA Calculator Crack Free

GPA or CGPA Calculator is a lightweight Windows application built specifically for helping users calculate their grade point average value (GPA) for the marking period, as well as the CGPA score, which represents the cumulative grade point average value. This is a Java-based utility, so you should make sure you have previously installed the working environment on the computer, otherwise you cannot run the tool. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to calculate the GPA and CGPA values on the breeze, without having to go through installation steps. GPA or CGPA Calculator sports a clean and intuitive layout that helps you configure the dedicated parameters with minimum effort. The application gives you the possibility to calculate the GPA by providing details about the credit hours, serial numbers, and achieved grades, while the CGPA value can be tweaked in terms of previously completed total credits, total credits taken in a semester, and the GPA value. Since it doesn't comprise many dedicated parameters, even rookies can master the process with just a few clicks. During our testing we have noticed that GPA or CGPA Calculator carries out a task very quickly, and no errors showed up throughout the entire process. To sum things up GPA or CGPA Calculator offers a simple yet efficient software solution when it comes to helping you calculate the GPA and CGPA values.
